Summary

Senior Full Stack Developer with 5+ years of experience building enterprise applications using **ASP.NET Core, C#, React, TypeScript, SQL Server, and Azure DevOps**. Led development across mission-critical software serving 50+ US government and public safety agencies, contributing to scalable architectures, CI/CD automation, real-time systems, and NIBRS-compliant reporting systems processing 100K+ incident records. Experienced in **technical leadership**, enterprise integrations, and AI-powered solutions using Claude and OpenAI APIs.

Technical Skills

- **Backend:** ASP.NET Core, C#, .NET Framework, Node.js, REST API Development, Microservices
- **Frontend:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, jQuery, Redux
- **Database:** SQL Server, PostgreSQL, SQL Query Optimization
- **DevOps & CI/CD:** Azure DevOps, Git, GitHub, CI/CD Pipelines
- **Cloud & Real-Time:** Azure, SignalR, WebSockets, Event-Driven Systems
- **Integrations:** REST APIs, Payment Gateway Integration, Microsoft Dynamics CRM, E-Signature APIs
- **AI & Developer Productivity:** Claude API, OpenAI API, Cursor, AI Integration, Prompt Engineering
- **Tools:** Visual Studio, VS Code, Jira

Work Experience

TatvaSoft

Senior Full Stack Developer

Jun 2022 – Apr 2026

Remote

• Mission-Critical Government & Public Safety Platform

ASP.NET Core · C# · React · TypeScript · Node.js · SignalR · SQL Server · Azure DevOps

- Owned and stabilized a complex enterprise platform serving **50+ US government and public safety agencies**, reducing production bugs and support tickets by **35–40%**.
- Built and maintained **NIBRS/UCR-compliant reporting** and automated data broker integrations, processing **100K+ incident records** submitted as FBI-standard crime reports.
- Built an enterprise **license management system** with role-based permissions and entity-level access control across multiple agencies.
- Developed **React and TypeScript components** for complex dashboard UIs, crime analytics visualizations, and role-based access control screens. Configured and maintained **CI/CD pipelines in Azure DevOps**.
- Integrated **SignalR real-time communication** and designed microservice-based integrations for secure data exchange.
- Led a team of **4–6 developers**, conducting code reviews and technical mentoring.

• Document E-Commerce Platform

NopCommerce · C# · ASP.NET Core · Payment APIs · CRM

- Customized enterprise **nopCommerce-based document marketplace** supporting subscriptions and digital document delivery.
- Developed **custom nopCommerce extensions** to support document workflows and platform-specific business logic.
- Integrated **payment gateway APIs** and **e-signature APIs** to automate secure document signing workflows.
- Integrated platform with **Microsoft Dynamics CRM** for automated customer data synchronization and order management.

• AI Customer Support & Automation Platform

Claude API · OpenAI API · Node.js · React · TypeScript

- Built an AI support assistant using the **Claude API** that handled customer queries by combining database lookups, document-based context, and general knowledge, reducing reliance on manual support staff.

• **Performance Management System**

ASP.NET Core · C# · SQL Server · JavaScript · jQuery · Ajax

- Developed an enterprise HR performance management platform for employee evaluation, goal tracking, productivity analytics, and workforce performance measurement.
- Implemented modules for **360° feedback, goal tracking, employee reviews, and HR performance dashboards**.
- Developed backend services, business logic, and **SQL reporting queries** enabling HR teams to analyze workforce performance metrics.

• **Timesheet Management System**

ASP.NET Core · C# · SQL Server · JavaScript · jQuery · Ajax

- Developed an enterprise timesheet management system for tracking employee work hours and project allocations.
- Implemented task logging, approval workflows, reporting dashboards, and project allocation features.
- Built backend services and integrated **REST APIs** for secure data processing and reporting.
- Improved reporting accuracy by replacing manual spreadsheet-based time tracking processes.

Education

• **Darshan Institute of Engineering & Technology**

Bachelor of Engineering in Computer Engineering (CPI: 9.01)

Jun 2018 – Jan 2021
Rajkot, India
